What We Do

Radiology

Our Radiology Department performs skeletal and chest x-rays on-site to assist our clinicians in diagnosing conditions such as pneumonia, fractures, dislocations, etc. Radiographers are medical personnel who perform diagnostic imaging examinations and are trained in anatomy, patient positioning, examination techniques, as well as radiation safety and patient protection.

Our Radiology Department is inspected by the State of California and is accredited by the Accreditation Association of Ambulatory Health Care (AAAHC).

Laboratory

Our Clinical Laboratory supports our clinicians' diagnoses through testing and analysis of patient specimens.

The laboratory is fully licensed by the State of California and the Clinical Laboratory Information Act (CLIA) and is accredited by the Accreditation Association of Ambulatory Health Care (AAAHC).
